## **INFORMATION ON SAFETY MEASURES OF FLIGHT OPERATIONS EVENT DRONES BEYOND 2023**

Notice is hereby given that on October 25th and 26th, 2023, the event "Drones Beyond 2023", organized by Distretto Tecnologico Aerospaziale (DTA) and the Municipality of Bari takes place at the Fiera del Levante Complex (Bari).

"Drones Beyond 2023" aims to be a moment of presentation of challenges, products and solutions of IAS (Innovative Aerial Services) to provide: an indication of the state of development of technologies and applications, a contribution to the important action of knowledge of the potential and utilities that they can generate, encouraging their acceptance and sharing, an acceleration of experimentation in real environments necessary to indicate and guide the breaking down of the still existing barriers to their full use.

The event will include:

- a conference session in the Centro Congressi del Levante pavilion during the mornings of the two days;
- the setting up of an area dedicated to the display of information material, models and prototypes of technological solutions and aerial platforms;
- the implementation of flight demonstrations of Innovative Aerial Services in the area of the Fiera del Levante Complex.

It is made clear that drone flight operations will be conducted on October 25<sup>th</sup> and 26<sup>th</sup>, 2023, and that:

- The remotely piloted drones used are electrically powered and have a Maximum TakeOff Weight of less than 25 kg. Operations will be carried out in full compliance with current aviation regulations (ENAC-UAS-IT, EASA 947/2019, ENAC ATM-09A);
- For all missions, drones will safely take off from the P168 area, which will have limited access. Missions that do not involve landing at P168 will use spaces accessible only by authorized personnel necessary to carry out the mission;
- The area of the Fiera del Levante Complex over which drones are scheduled to fly is shown in the figure on the following page, and the corresponding Ground Controlled Area (GCA) will be confined by barriers and will be accessible only by authorized personnel;
- Supervisory personnel will be present to control access to the restricted areas and manage risks associated with flight operations.

**It is therefore made mandatory to respect the restrictions on access to the areas described above, to ensure safety levels and full applicability of the Emergency Response Plan (ERP). No liability is accepted for facts resulting from any kind of violation of the areas indicated, and from failure to comply with the instructions given by the personnel in charge and the security measures provided.**

**Last updated: September 2023**

This policy may be subject to change over time - including those related to the possible entry into force of new sector regulations, the updating or provision of new services, or to intervening technological innovations - so the user/visitor is invited to periodically consult [www.dtascarl.org](http://www.dtascarl.org).
